

CM-16

Efficient pumping

The CM-16 transfer pumps have a high pumping capacity and a robust design.

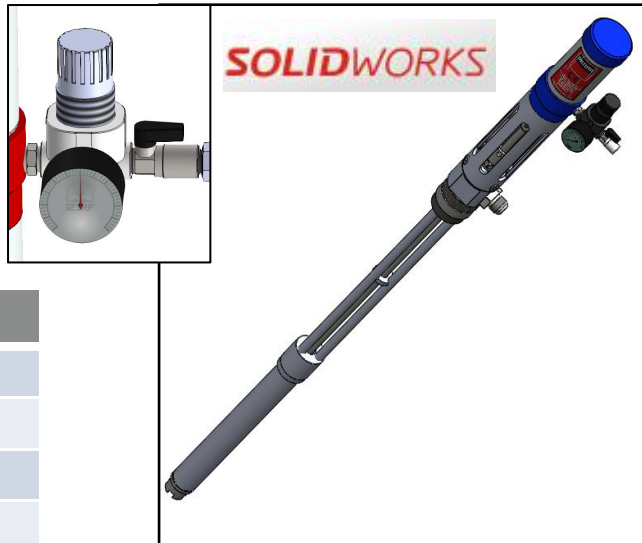

- Great pumping capacity for Polyol and Isocyanate.
- Pumping system powered by compressed air.
- Threads for coupling to 300L drums.
- Protection cases in blue (Polyol) and red (Isocyanate) to differentiate the products.
- Adjustable air pressure.
- Own design and manufacturing.
- All components are easily replaceable and available from stock.

Adjustable pressures

Made in Spain

Model	CM-16
Air pressure	99.5 psi
Air consumption	200L/min
Outlet pressure	284.5 psi
Pressure ratio	2,8 : 1
Output flow	30L/min

Optional equipments

Spray gun
Spray equipment
Compressors

Spray gun accesories
Heated hoses
Air dryers

Recirculation Kits
Heating drum bands
Electric generators
